How To Determine The Correct Cushion Sizes For A Deep Seating Club Chair

Two Piece club chair cushions sets are 2 separate cushions.

The most important thing to remember is that the back cushion sits **ON TOP OF** the seat cushion.

If you are measuring the chair frame, you need to subtract the height or thickness of the seat cushion from the height of the back cushion.

If you don't the back cushion will be too tall!!

FOR EXAMPLE

If the overall chair back height measures 24" from the chair seat to the top of the chair frame, and the chair seat is 4" thick, then you will need a 20" tall back cushion.

Not sure what size you need? Just contact us.
